

# MULTI-USE WATERPROOF TAPE

*Ajover*

The **Multi-use Waterproof Tape** is an efficient, practical, and economical solution for construction, maintenance, and repair work.

Thanks to its flexible composition, coated with aluminum, asphalt, and special additives, it is ideal for waterproofing and repairing internal and external areas as well as construction details.

The **Multi-Use Waterproof Tape** stands out not only for its versatility but also for its ease of use. Its silicone coated underside, easily removable, allows for quick and hassle free application, making it ideal for both construction professionals and users carrying out home repairs.

This practical and affordable product adapts to the needs of different users, from small projects to large works, providing a reliable and long lasting solution to keep spaces protected from leaks and moisture damage.

## ADVANTAGES

- Easy, fast, and clean application; does not require specialized labor.
- No torch is required for proper installation.
- Its flexibility facilitates application in hard to reach areas, ensuring optimal sealing.
- Do it yourself.
- Adhesion to most materials used in construction.
- Resistant to UV rays and weather exposure.

## PRESENTATION

| Code            | Multi-Use Waterproof Tape |
|-----------------|---------------------------|
| CCTTGBAL0961C10 | 10 cm roll x 10 mts       |
| CCTTGBAL0961C20 | 20 cm roll x 10 mts       |
| CCTTGBAL0961C30 | 30 cm roll x 10 mts       |
| CCTTGBAL0961C50 | 50 cm roll x 10 mts       |

## COMPOSITION

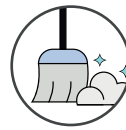

Modified asphalt and aluminum foil.

## USES

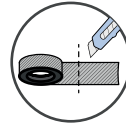

### For waterproofing and sealing

- Repair of sheets and roofing tiles.
- Sealing of gutters and downspouts.
- Repair of cracks, joints, seams, and overlaps between roofs of different materials.
- Finishing details on awnings and skylights.
- Sealing of ventilation ducts, air conditioning systems, extraction systems, electrical and telephone cables.
- Quick repairs on balconies, terraces, and joints at home.
- Repair of asphalt waterproofing systems.
- Adhesion to most construction materials.
- Metal bodies, campers, and others.

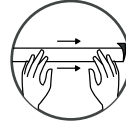

## INSTRUCTIONS FOR USE

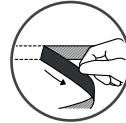

1. Clean and dry the surface to ensure proper adhesion.

2. Cut the **Multi-Use Waterproof Tape** according to your project requirements.

3. Remove the self adhesive protective film from the tape.

4. Correctly position the tape on the surface.

5. Press the **Multi-Use Waterproof Tape** with a clean cloth or a rubber roller to ensure uniform adhesion.

## INSTALLATION RECOMMENDATIONS

To ensure long lasting adhesion of the **Multi-Use Waterproof Tape**, properly prepare the surface before application. Make sure the area is clean, dry, and free of dust, grease, rust, moisture, or any residue that may interfere with adhesion. If necessary, use a clean cloth and an appropriate degreaser to remove impurities. In the case of porous or irregular surfaces, smooth or prepare the surface beforehand to achieve better contact with the tape. Additionally, note that the tape must not be exposed to vehicle traffic, nor applied in areas with negative hydrostatic pressure or zones involving immersion.

## STORAGE

Store the **Multi-Use Waterproof Tape** in a covered, cool, dry place protected from moisture to preserve its quality and functionality. Keep it in its original, sealed packaging, away from direct heat sources or solar radiation, for a maximum of 12 months at room temperature. Make sure to keep the product out of the reach of children and pets to ensure safety. Proper storage extends the tape's service life and ensures optimal performance during application.
